

## Skills

JavaScript, Ruby, Ruby on Rails, React, Redux, HTML, CSS, SCSS, C++, Three.js, Mongoose, MongoDB, Node.js, Express.js, SQL, SQLite3, PostgreSQL, Amazon Web Services, Webpack, jQuery, Git, Heroku, Procreate, Adobe Premier, Photoshop & Lightroom, Google Drive, Excel

## Education

**App Academy** | Fall 2021 | New York, NY

1000+ hour software development course with focus on full stack web development and a 3% acceptance rate

**New York University** | Spring 2021 | New York, NY

BA of Philosophy, Minor in Mathematics & Studio Art

## Projects

### gLives

[live site](#) | [github](#)

JavaScript, Three.js, HTML5, CSS3, Webpack, Vectary

*A third person video game / experience where you are playing as a ghost cat wandering through a forest. The objective is to collect all of your nine 'lives' or hearts so that you can come back to life.*

- Employed Three.js in combination with original objects and images created using Vectary and Procreate App for compelling three-dimensional graphics and a unique user experience.
- Incorporated key inputs in JavaScript to allow for an enjoyable sensation of character movement for the user.
- Utilized OOP (Object Oriented Programming) to provide cleaner and more readable code.

### Spelled

[live site](#) | [github](#)

JavaScript, React / Redux, Ruby on Rails, PostgreSQL, CSS3, AWS, Heroku, Webpack

*A clone of the luxury fashion ecommerce website Grailed, where instead of selling menswear, users can sell and 'purchase' Magic the Gathering cards.*

- Established multiple fully interactive CRUD functionalities including users, listings and comments.
- Created single-page, responsive web application in accordance with user-friendly, professional design.
- Managed PostgreSQL database storage and Redux state to pass information between the backend and frontend in prompt manner to enable a seamless user experience.

### any Wajers?

[live site](#) | [github](#)

JavaScript, React / Redux, Node.js, Express, MongoDB, Mongoose, CSS3, Heroku

*any Wajers? is a social media website where users can go to meet others to play the games they love.*

- Leveraged ES6 syntax and object-oriented programming (OOP) paradigm to develop DRY, modular code.
- Collaborated with teammates to concept, design, implement, and deploy a MERN full-stack web application.
- Utilized Express and MongoDB to maintain and update information in the database.

## Experience

**Email Marketing Manager/ Fulfillment Associate** | June 2019 - Nov 2019

Beyond The Streets, New York, NY

- Booked and coordinated and facilitated approximately 8-15 guided tours a week for showings of the exhibit.
- Managed the company's email accounts by responding to 50+ customer and buyer inquiries daily in a timely manner.
- Assisted and accelerated the fulfillment of 100+ online orders and art pieces for buyers on a weekly basis.
- Staged and executed photoshoots of merchandise for the online store and social media accounts and edited photos using Adobe Lightroom and Photoshop to help increase product recognition.

**Intern** | June 2018 - Sept 2018

Californians For Energy Independence, Truckee, CA

- Transpiled and digitalized customer data on 300+ forms into Excel spreadsheets which allowed for efficient manipulation of the data.
- Performed daily content analysis of social media regarding the industry to construct agenda monitoring reports to assist the CEO in their duties
